Real Time Cleaner - Usage

All you have to do is to download and install Real Time Cleaner and you are ready to delete your online and program activity tracks. No manual configuration or settings are required. Just select from the list the items you want to be cleaned, and press "Clean".

The "**Scheduler**" offers functionality for setting an **automatic cleaning period** of the selected items from the list, and the option of performing a **clean on system startup**.

IMPORTANT NOTE: Some Internet items cannot be cleaned if Internet Explorer windows are opened, so if you want to be sure your online tracks are cleaned, close all Internet Explorer windows and then perform a clean.

Also, see the **"Tips & Tricks"** section for detailed information about these items and best ways that fit your cleaning needs.

Real Time Cleaner - Tips & Tricks

<u>Clean options</u>	<u>Description</u>
"Clear Internet URL History"	Internet Explorer windows must be closed to clear the History. If you do not want your internet activity to be logged at all, before you start your internet session open an internet window, write an address, wait until the page loads completely (you'll see that the page was added to the History). Now close all Internet Explorer windows, and perform a clean. After this clean you'll be able to browse the internet and no address will be added to your History. NOTE: You have to do this cleaning only once in one Windows session (meaning you don't have to do it until next time you restart your computer).
"Clear Typed URL"	Internet Explorer windows should be closed in order to clear all typed URLs
"Clear Temporary Internet Files "	Can be performed even if Internet Explorer windows are opened.
"Clear Internet Cookies"	
"ClearAutoComplete Forms History"	
"ClearAutoCompletePasswords History"	
"Clear Internet Explorer Favorites "	
"Clear Temp Files"	We recommend not setting this option when selecting the automatic clean setting. When installing or running programs on your computer if this option is enabled, it is possible for the program to clear temporary files, which other software might create.

Real Time Cleaner - Troubleshooting

If you encounter any problems with the software, or have any questions, please contact our support team: support@amplusnet.com

Real Time Cleaner - Requirements

Operating system: Windows 98/Me/2000/XP/2003

Real Time Cleaner - Evaluation and Licensing

Real Time Cleaner Trial Version expires after 15 days. After it expires you will no longer be able to perform a clean of your computer. You will have either to uninstall the product or to register it.
